

A Poll posted on Gab.com https://gab.com/C_OLDHAM/posts/112957793441138974

The 15% was arbitrary. It could have been 12% or 9%. I picked 15% because that is half the nearly 30% most credit card charge today.

Some of the reasons::; 1\ I think we all want to take away some of the ammo the Corporatocracy is firing

at us as we struggle to pay for the necessities. 2\ Nobody likes paying debt that get interest added to interest that makes more debt. Leaving us running up hill to get free of debt. 3\ I do think that within Common Law, privet contract, #ParallelEconomy in a Community base systems is viable. 4\ #WeThePeople need our own fair system that we can work together with. 5\ We have to think outside the mental box to escape the box laid out for us by an Oligarchy Corporatocracy . 6\ People want to help the couse of freedom but may not know how. The interest collected can go to help other struggling families in their community. And be a red pill at the same time that there hope out there.

Simple interest verses Compound interest is not as well known as you might think it is. The blue collar way I like to think about Simple interest is as a flat rate for a service. With a beginning and an end. Compound interest is open ended and can go on forever and expensive. Of course the legal language for both might take all day to read through. An article on this: <https://cred.club/calculators/articles/simple-interest-loan-vs-compound-interest-loan>

Then there is Consumer Finance Law that takes weeks. You can learn more abot that here: https://www.youtube.com/results?search_query=consumer+credit+laws+

A local business owner could be the facilitator that get a \$50 commission each privet loan.

A local group of people backs the loans and does the vetting. Could be ag ood Side hustle for a single mom, former clients of this & others.

Red Pill; a constitutional & civic basic education comes with the loan. Pro rate the interest more if they learn. Works on free will merit system. ++ Teach them to be freedom warriors.

Doesn't mean they're be good at it, just makes the client more likely to participate in their community more. Because they know more.

This is part of a larger idea. This is not all of what we have in mind, but a summery.

Build Proposal:
National Campus & Meeting Convention Center For
All Pro American Grassroots Offices Working Together
On Common Goals and Constitutional Education. W/
Temporary Housing For Homeless Veterans &
Battered Women While Getting Employment/
Entrepreneur Training.

Build Proposal: 34,000 USA Counties.
Local Offices Helping American
Families With Regain Their Sovereignty,
Get Out Of Debt, Homeschooling
Assistance, Legal Aid, Adult & Minor
Constitutional Education, And Help
Navigating Government Paperwork.

Good Morning from Patriot Head
Quarters. TheS2Project.com

**We have a solid vision of how to help get America
& Americans back to standing on free ground.**

However with Americans excluding  themselves from the beginning of the process.

We are not be able to go all in 100%.

**Our apologies for the delay as our fellow
Americans continue to sleep unhelpfully
wrapped in what is not the truth.**

Everything takes people. There needs to be in America a fundamental change in the way We The People think. Going back to what was founded. Not staying with what the government has lied to us about for a hundred years or more.

The true power we have as Americans
over government works like this.

The Power of the People to GOV., Inc.

We're going to over rule ya`.
Then we're going to sue ya`.

If you're not on board with that, then
what you know needs to be replaced
with better information.

This leads us to what we describe as *The American Paper & Ink War*.

Governments live on paperwork. They can't survive without it. So much so that their overflow drowns the American People in regulations, fees, penalties, threat of arrest, and form request forms to fill out more forms. But did you know that is a two way street?

Then there is the weaponizing of government departments against the American People. From the Federal Government all the way down the chain to your local library. Big cities to small villages. It's all one big corporation. Any town that avoided incorporating got taken over by the county government (INC) because the little town wouldn't play their game of fake government.

It is a two way street because much of that paperwork can be weaponized against government. This what

we founded The S2 Project to do. As a solid path to bring us back to being a Constitutional Republic again. Removing the fakery in the small places in America. Then growing from there. When you know what the enemy is doing on paper. You know how to attack them. It really is that simple.

Government's ammunition comes from The Organic Act of 1871. And the regulation to restrict the people written after that. The Peoples' ammunition is what was written before 1871 that restricts government. Plus a few gems of legislation written after. The Freedom of Information Act (FOIA) being one of these.

Weaponizing government paperwork against government? Yes, when you look at it with the critical eye of whether or not it was legal for government to write that piece in the first place. And if it does not meet the *Marbury vs. Madison* * stiff test.

There is do much that Americans can do. There is great freedom to be had in a peaceful revolution by the pen and keyboard strokes. What is needed is the motivation to move away from the bread & circuses provided by the TV programming of the minds. ***In my opinion; Rather that watch televised millionaires run around on fake grass with a ball. It is much more entertaining to participate in putting a local crook politician in handcuffs that will save my wallet further taxation. I consider this the attitude of what it is to be an American Patriot.*** (I've seen hundreds of memes on social media that say about the same thing.)

Over all as Americans we doing things differently than we have is the salvation from becoming a socialist country. Voting for a Trump new and better administration for a second term is part of it. But it's less that 20% of the whole solution. Political Swamp Rats exists in every community across the land. As such, 80% of the excommunication and eradication is up to us. Otherwise they'll just go hide for 4years then come back to be in our faces again.

* Marbury vs, Madison = *Marbury v. Madison* (1803) is a legal case in which the [U.S. Supreme Court](#) asserted for itself and the lower [courts](#) created by [Congress](#) the power of [judicial review](#), by means of which legislation, as well as executive and administrative actions, deemed inconsistent with the [U.S. Constitution](#) could be declared unconstitutional and therefore null and void. State courts eventually assumed a parallel power with respect to state [constitutions](#).
