The nuts in a nut's shell.

Deep down rooted at the bottom Matrix is where you find the Democrats in our society. Under the mixed layer of *Normies & Ineffectuals* & the standard variety of Republicans. All combined, it's one big mess of thick viscus **Goo**. This is the American public in a wide view.

None of which can find their way out of an open paper bag. They're just there and that is where they'll stay. Without someone else giving them a hand up to save them, they're done. For them- the end.

It's totally nuts. Of the Goo. By the Goo. And For the Goo People. Viscus Goo, by it's very nature doesn't move very fast. It tends to stick in place even when everything it touches is turned upside down. And I do believe we are well on our way to being upside down.

So in that, the **Do Nothing People** are now the **Goo People**. Democrats are Goo Roots the Goo People stick to. And the Awakened to take action(II%??) have learn to wash the Goo off. **Don't be Goo.**

In addition, the country of Australia is a sub corporation of the United States corporation as are other countries. These corporations are different from the people. USA- The Republic, in Australia- The Commonwealth. These distinctions are mastery of deceptions in the way they are worded. The examples of this is nearly boundless in the effort to enslave all of the common humanity.

WE HAVE a MAFIA, NOT a GOVERNMENT- This need to end now!

Didn't I say the Act of 1871 needs to be repealed? (I DID!) Ending the compliance of that act in our communities is a #WeThePeople job now. While We wait for the top down to catch up to what the grassroots folk have been working for. Our independence again.

Watch (**reference link below) the video more than once. The narrator is a bit over excited & leaps over some details. Catch and research any web links you see.

When you are educated- From the date the repeal happened- I do hope that every American will be

demanding refunds. For fines (where no injury or property damage occurred), permit or permission fees paid, unwanted and requested services (assumed-water/sewer Or garbage collection Or Fire/Rescue Services do not qualify.) Sighting this repeal.

Remember? *We're the home of the brave.* Flushing the swamp at home starts with Us. Learn something. Get your money back. Write a letter to city hall. Toss documents in their face. **Start a fight.**

The American Paper & Ink War.

Trial by Jury in Common Law & how do we go about doing that? It's worrisome that we may not have enough people of motivation "IN WE THE PEOPLE" to conduct 'DUE PREOCCESS'. Assembling juries as we prosecute the criminality that is/was government's failed fiat system.

<http://www.pauljjhansen.com/?p=319>

For most Americans the only reference they have for doing this is what they have seen in old western movies. Where the part for jury selection ended up on the cutting room floor. And that sitting in a real local courthouse jury pool which was all part of the fiat system's movie.

Common Law Courts are different where the old western movie reference holds true. These are **THE PEOPLES' courts**. Not the ones you've been lied to be a witness of your whole life. Though similar enough to make the lie stick.

Worrisome for that people currently will not stand against a taxation up to 50% or more and representation that has left them. Worrisome that jury duty has become something to be avoided. If we are to prosecute government's criminality the trends on both needs to be reversed. With a shift to common law promoted by THE PEOPLE. And not lead forward by the 'famous' or wealthy.

I do realize that when the adults' topics pop up in the middle of the shit post universe, Normals panic and become blind, deaf & dumb. But the serious items must be discussed to get serous results.

I'm not scared of where the monetary or political system might go. What scares me is the amount of clueless people. It's astonishing on how surrounded you are in any public place. Once you become aware that in year it's all going to be different. I'm not the first to say this or the last.

It's the people that can't say that at all whom are devil like in their default ways. For them, change is taboo. Yet the good, the bad and the ugly of change is being shoved on them. And they don't know how to steer the ship or drop an anchor. They sail on as if it's not happening to them.

What's needed? Quite a lot. Motivation reaching the top of the list that doesn't point to sitting on front of the TV set. Next, conviction to do something that works a solution somewhere. *We can begin there.*

The Cost of Patriotism by taking a stand, paying people to do what should be done by The People themselves AND the cost to do nothing at all. By the numbers!

The American Paper & Ink War.

I'm in to this several times a month. It's an ongoing conversation with in the right side of politics grassroots people. "The Doers" As most people continue to sit on their butts. If you take a stand or don't, there is a cost.

It's pay people to do your job as an American, D.I.Y. or do nothing.

OR

Same as above with an annual operating budget of \$2,200,000 +/- 10%.

OR

An average net loss per household of \$1,800 + loss of more freedoms & liberties with out end.

PART 2: Maybe I said the truth out loud that people don't want to hear. To fill in for all the Patriots that should be doing the doing for freedom with a full time salaried crew, it would be a couple of million dollars in each community or county.

This highlights the true value and power of what it is to be an American applying their rights to straighten the whole mess out locally. Making freedom a task that is DO IT YOURSELF cheep with volunteer teamwork. I'm merely counter pointing what it would take to pay other people to do the job of being an American in a Constitutional Republic. When the public won't stand for themselves.

I only list the costs in dollars. Though the benefits are huge and many. And often monetary. If We, as a people, ever get off our asses. Freedom is not free. But the rewards to Patriots for getting our freedom back are not cheep for those that seek to oppress those freedoms. -Commander for The S2 Project

Multiply that by 94,000 communities We have in this country. It becomes a major problem. Explains why children go missing. And why your wallet is lighter & the cops act like tyrants. Too many blindfolds willfully applied and not enough eyes that see.

Our apologies for the delay as our fellow Americans continue to sleep unhelpfully wrapped in what is not the truth.

Catch 22: Without the public largely waking up to the basics. We can't help the public wake up past the basics in a large way. There is so much to learn that will benefit the American People. The truth will set them free.

Undoing the Catch 22 all starts with Pro-American Volunteers and grows to create massive amounts of millionaires through a freedom knowledge an merit based system. By moving from the Patriot rhetoric to the actual "work of Patriots" that is required. Without this fundamental shift, We, as #WeThePeople are stuck with what the government and the political left-wing feeds us. Taking away our self sufficiency potential daily.

Such a potential is depicted in the graphic below. And is not limited to what is listed. There are many more helpful ways freedom can be brought to get families to the front of the line. What's missing is the Ushers willing learn enough of the process to guide them.

Do you like Fake?! I like fake. (rhetorical)

There is a law -in International Salvage Law- that says you can take over a public building far inland by filing a salvage claim on that property. A court house, a school, a park. But the jurisdiction incorporated for the first time in decades, will pull out Common Law to fight you.

The Dems & RINOs get away with so much because they pull the same *switcharoo* for that two-tiered justice game when they get on the bad side of it. In other words, guilty as hell.

The good news is that it's a multi-player game. When I talk about The American Paper & Ink War, I'm saying that good citizens can jump the law fence too as part of that. With out being a lawyer to do it. The whole trick to it is not being a lone wolf against the machine.

I have said it before. Teamwork is the key. Indivialism will get you squashed. Also, one truth teller on a soap box is a nut case, 1,000 is an army. It's the "We" in "#WeThePeople" that folk have a hard time understanding outside of the voting booth. Americans should start wrapping their heads around the "We" part to end the chaos.

Above I said I like fake. When you can use Stupid's fake against them, then I like fake a lot. It all comes down to what side out numbers who. Truth wins over fakery when truth gets abundant support and not before.

There is not enough people who understand that their compliance to fake laws makes us all miserable.

Meme: **This is true.**

Name the most under applied asset for American Freedom.

*Paperwork by the
American Patriots
with common day jobs.*

In a Constitutional Republic this is how our big riots and jumbo peaceful protests are to be done. Really. This is what the Founders of this country set up as our legacy. This is why the overly rich chose to attack & control our education first over 100 years ago. Including medical field. Followed by the free press. All forms of learning.

Why even Black's Law Dictionary began to be changed and compromised starting with the 5th edition. Making the modern online version a piece of crap. Just so you researchers out there know. It's the unrevised 4th edition or nothing. And yes, the older the bible, the truer the word.

In a Constitutional Republic the paperwork we so apply documents and justifies the #2A wholly, to break out the Rifles of Liberty if WE do not get our way with proper representation. Insert Patrick Henry's & Daniel Boone's political careers here. But it should not be necessary.

Ink on paper not just digital warfare is the attack, the fight back, freedom requires. So far we've barely scratch a beginning. An accumulated \$1 Trillion in lawsuits filed by The People so far is just a scratch. 100,000 #FOIA request in 5 years is not even a bruise. The Game Stop event only raised an eye brow. 'The American Paper & Ink War' & it's potential impact for renewing freedom is worse off than the Continental Army was at Valley Forge. We need to do more. And make it local.

There is plenty of 'wake up' going on. But very little 'stand up' to go with it. We need to riot with paperwork. Local teamwork is the key.

Cover government's wokeness by the weight of it. Let them get crushed under it in our communities' city halls. Their fiat system not be left to stand on auto pilot doing as it pleases. People must start learning that We are the Boss. And the constitutional paperwork that goes with that. The save your wallet paperwork Too.

Local teamwork is the key for sharing the load & teams within teams that can work together. Organize where you live. Learn. This is how We get out from under 100 years of bad information that works against us. Quietly, a day at a time, knowing and growing. Until a community cannot stay quite any longer. The newly gained knowledge can't tolerate the fakery of government any longer.

Then it's full on attack mode and politicians & judges buying plane tickets for New Zealand. -- I could talk about the 'How To' all day or more. Add a "Just Do It" to it.

But first The People have to bring the motivation. Freedom & financial independence as a "I Want!" & "I'm Ready!" by the easy path of using teamwork. No teamwork to do the paperwork goes to "Don't Get" of more "This Sucks" status quo.

All ya all just can't help yourselves, can you? You're stuck in an affliction sucking on a teat filled drug of Federal Fixation and just can't break away from drinking the milk. The media and social media commonality of popularity are your Drug Dealers & Pimps. All eyes on DC or anywhere but none for community.

I'm the unpopular opinion because I can see, and I can hear. I ask people all the time- "Where do you

live and who's the mayor?" I know I'm right by most of the time getting only half an answer. It can't be any different from you all reading this than when I ask person to person in the real world. It just can't. Denver is under siege by Venezuelan gangs due to failed policies. But it's closer to the truth that it's failed citizens to protect their home turf. Liberals will now flee the Denver area/county wide to fill conservative neighborhoods where more people with fail to protect their home turfs.

From 1775 there is an expression; Unite or Die. The communality spread over the digital world is not going to help you. At best it's a party phone line. Calls for help are not going to be answered from 11 states or countries away.

We turn our backs to the federal government and they die. Make our hometowns strongholds and free. Local recall elections to get rid of the chaff. Reduce townhall employment to the necessities. Tell the local courts is common law or fuck the hell off & we'll lock the joint up tight.

I'll apologize that I'm of the advances class on liberty and know how to do all this Patriot Stuff. It's local and it's teamwork. Mostly it's doable with enough willing in any community. But my apology dose not include you sitting on your ass, America. That is between you & GOD from the confession booth. With a lot of would of, could of, should of thrown in.

As of the writing of the compilation, The Hell's Angels were reported being en-route to Aurora, Colorado that is a suburb of Denver. See new for 8/30/2024 or social media on the topic for this day. I'll say this for the Hell's Angels. They're anything but complacent when someone messes with one of their own people or families.

The comparative here is really weather or not you know what you are as and American. A warm body zombie or a sovereign man or woman of flesh & blood. The zombies are like everybody or what is considered normal, broke, miserable because they are compliant & typical. The sovereigns are kings where ever they plant their feet. Because they know more and stand their ground. Stand one's ground is where the wealth of freedom comes from.

Even though I've seen the Advanced Class double in size several times in the last decade. This Warrior class of American Patriots is still very small.

We Few, as I call them. Smaller than the Coast Guard in number I would suspect spread out across the country. That the rest of the population considers the "Other Guy" that should do their civil responsibilities for all of them.

These Other Guys & Gals that put school boards on notice, putting board members in their Civil Servant places. The Other Guys & Gals that do the deep research. These Other Guys & Gals who make a stand. All wondering where the hell is everybody else?

Where did the idea that government was ever going to fix government come from? The only fix the government is going to do is fix it so you never win. Outside of government, TAG !, you, me & stupid are "IT". WE are all we got. I don't expect people to fix stupid. But don't you think we're past time to upgrade stupid to 'reasonably helpful' ?

We're not short on patriotism. We're short on personnel applying patriotism for freedom's sake!

WE HAVE a MAFIA, NOT a GOVERNMENT

You can bring an American to the waters of logic, but you can't make them think. But the gators will eat well.

Really, there is menu of 'do nothing' that comes with a side order of stupid complacency. Even when it's little push-backs. And the gators of local government are getting fat on the abundance of all this silence. Government is whatever city hall writes or gives a check for. Or a rule they enforce that is out & out fraud for most of it. *What about D.C.? %&*&^@* screw them.* Unless you live in a capital city, Screw the state too.

Here's a cup of logic, take a drink. Community First everywhere is how we get to #AmericaFirst.

Double dare you to drop the fixation programming of the federal GOV., Inc. Most people have an I V drip information into their brains of everything not near their location. That's stupid.

Is the city clerk a commie jerk? Who's counting your votes? Could the mayor be double dipping his expense account? Are all on the school board 'Yes Men' to the Teacher's Union? You should want to know these things. What's the advantage to being an oblivious lunch item? *Seriously.*

There once was a guy that bought 10 soda machines. He gave them away to 10 friends in exchange for 5 cents on every can sold. In 6 months the machines were paid for. He then quit his full-time job for a part-time one. & Played a lot more golf. But was making more\$ than when working the full-time job w/ the 5 cents per can. His friends caught on to this just by asking him how we can play so much golf. He told them and did they same themselves too. Everybody won. (Short story version.)

The power of teamwork while expanding/sharing your knowledge. Is under appreciated, under utilized, sometimes feared for no cause or put into practice. Freedom is a process that starts with one but needs many to win. And a willingness to make a few changes on the journey.

Teamwork is the key for:

- Sovereign freedom locally.
- Wealth when you have nothing.
- Support in hard times.
- Mutual self defense.
- Kicking ass & taking names.

I worry about Americans.

{rhetorical test question} The first 5 words of the 4th Amendment with out looking it up, go_____

While within the #gabbers on @gab may be a higher percentage that can answer that. The general population at large is clueless. They think knowing these 5 words as an amazing feat of intellect. Or that you're just odd for being informed.

Popularity of information is sewed out of the realm of true importance. Because of where attention spans are placed. Using myself as an example. I can no longer name one Football QB on any team. They took a knee, %\$##^Fk `em & their back offices. But can give 3 definitions for treason and show as many examples in small towns.

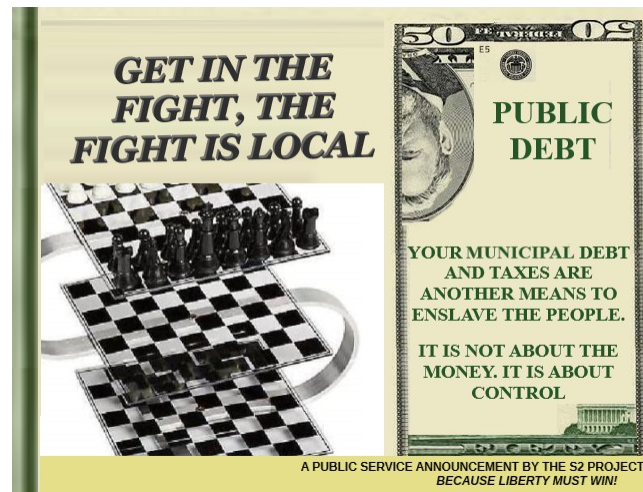

My point here is where you place your attention span is the wealth of your intelligence. No one can fault

you for placing it on family, The Lord Almighty or on J_O_ver_B_roke. Though you are responsible for placing it on stupid & spinning the wheel.

....Quote--*"Pay stupid games, win stupid prizes."*

We have a #GreatAwakening going on here and so many aren't playing because of the succubus of distractions. I worry about Americans getting over a 10% hump of important information realized & becoming standard. Replacing their popularity of information filled to overflowing with distractions. We as a nation need this improvement.

We do not have the volunteerism by quantity that is needed on the right side of politics due to dumb ideals. Even for the simple quick anonymous tasks that are numerous. Collectively those tasks are effective. Devoid of humans(?), they're useless & gather dust.

What is Forgery?

Forgery is making, using, altering, or possessing a false document with the intent to commit **fraud**. Forgery can be the creation of a false document, or changing an authentic one. Forgery is a crime that is classified as a **felony** in all fifty states and by the federal government.

There are several elements to the crime of forgery, and all must be proven before someone can be found guilty:

A person must make, alter, use, or possess a false document. Forgery can be creating a false document from scratch, or altering an otherwise genuine document in a material way. The alteration is material if it affects a legal right. For example, a document like a **will** may be otherwise valid according to state law, but if someone other than the **testator** signs it, the will is a forgery. A forged signature misrepresents the identity of the person whose will it is, and that has significant legal consequences.

The writing must have legal significance. Not just any false writing will be considered criminal forgery. Common examples of documents with legal significance include contracts, passports, drivers licenses, deeds, receipts, checks, wills, certifications, professional licenses, prescriptions, historical papers, and art. Legally significant means that the document affects legal rights or obligations. Signingsomeone else's name on a friendly letter would not be forgery because it is probably not legally significant.

On the other hand, signing someone else's name on a letter of recommendation for a job maybe forgery because it might affect employment and that is legally significant.

The writing must be false. The writing must have been created or changed in a way that makes it appear that the document represents something that it is not. The fundamental meaning of the document must have changed because of the forgery.

Intent to defraud. The person committing the forgery must have done so with the [specific intent](#) to defraud or trick another person or entity.

“The Quartet”- Joseph P. Ellis

Final note; The salvation of freedom in America is at the tip of the pen loaded with the ammo of ink. For it is that ammo that has suppressed us, robbed us, fooled us, lied to us by the very people we elected to represent us. All from the barrels of their pens. What the people have not begun to do yet is fire back, Not in quantity. Not in quality. And certainly not with curiosity or ferocity.
