If your not active in stopping COMMUNISM in your community then you're much too excepting of receiving COMMUNISM in your community. Making YOU the Stupid we all hope to avoid.

#2A is not going to save you if you let it go so far as to seeing communism knocking on your front door. Liberals that wanted this degradation will be the worst off.

You've been asked nicely to wake up & stand up for years. Warned repeatedly what is happening right now was going to happen. Wanting more or worse in the future is stupid on steroids. Thinking some other force beside you is going to save your butt. Is a fantasia that has no guarantee of getting your butt saved.

I told Mr. Bailey (@ on gab that I'm not going say to save him some grief-BTW- His question was a good one!) that I would be delighted to share all I know about winning freedom back. But he never answered my reply question. Asking how he felt about giving up all the excuses.

About learning & applying the solutions. We got 529 of those to pick from. Something for everyone with teamwork. With ways to fly under the [Fed's] radar until it's too late for [THEM] to do squat about it.

The S2 Project first rough draft. Our basic procedure was called the "Monster of MAGA", the end of the Democrats, back in 2017. By political analysts that had worked both sides political of the isle who read the draft. A community based approach for freedom.

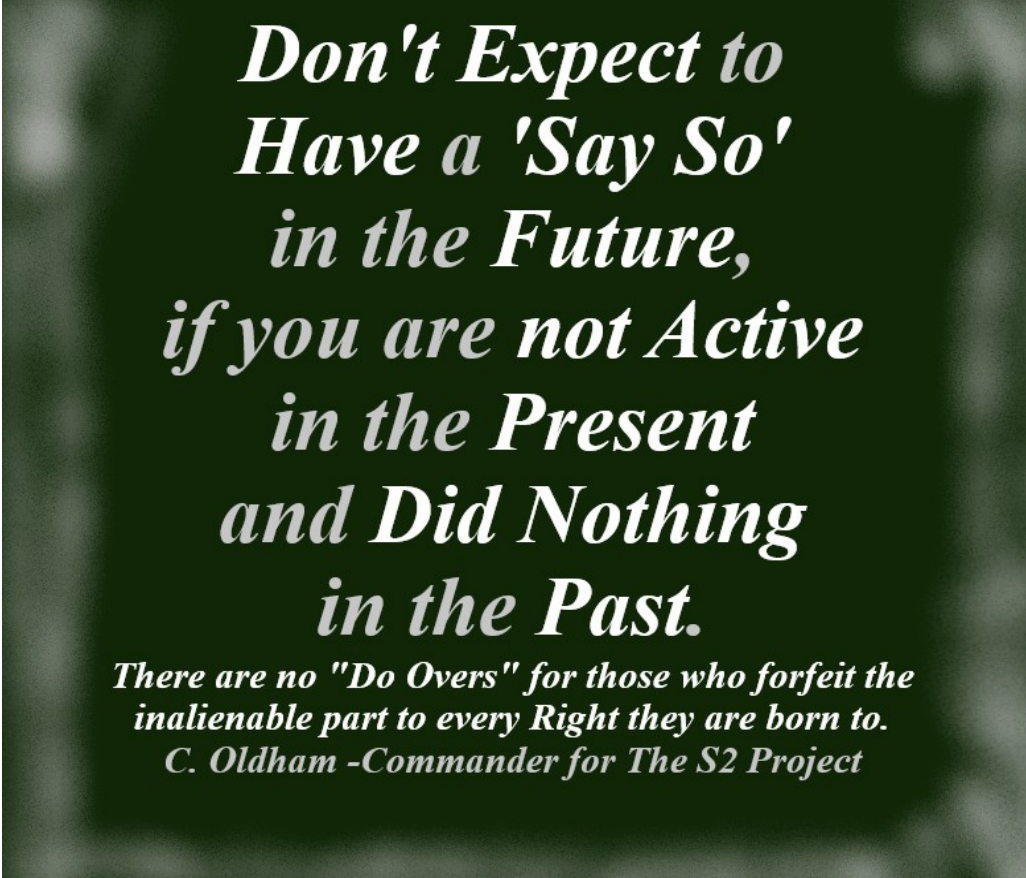

The major thing stopping us from ending Democrats is the excuses of the pubic to stand up. Since 2017 we've improved and added on volumes to that rough draft. WAITING for the public to end the stupid that is within themselves & unite for a better America. It can be done.

The American Paper & Ink War.

A serious PSA message to every man & woman who made the choice to be an *Ineffectual Noncombatant*.

Read that and tell me again that you don't need to defend the home fort that is your hometown. That

turning your back on your home community is not worth the effort because you can flee to someone else's home turf that the people there felt the same way about where they live. Just as undefended as where you fled from.

The fight is Local--EVERYWHERE. Always has been and always will be. You're Federal Fixation Syndrome affliction is a terrible fooked up way to live! Ineffectual Noncombatants sucking the teat of national media clueless of the commies at home on your own turf.

Tell me how your little town/city council is perfectly 100% Pro American guaranteed and 100% won't cave to commie pressure from on high. And can say unquestionably the same of the police, sheriff and the judges where you live.

Tell me you can run away from responsible civil self governance to a wealth of ignorance is how your going to save your family. Or your multitude of excuses will save anything.

Most importantly, tell yourself you fooked up and it's time to get busy.

The S2 Project--We Investigate Government!

And we can assure you NO PLACE is safe until We, The People stand up for ourselves, united & local.

We do not have a government, we have a mafia---hiding all the way down to your local library.
