3916 North Potsdam Avenue, 1591, Sioux Falls, SD 57104

round to deploy our best weapon, **the Freedom of Information Act (FOIA) request.**

Freedom of Information Act kicks more government doors than any other citizen tool. Let us show you how to use it for the best effect using the team concept at, [thes2project.com](http://thes2project.com)

## Identifying Where You Live.

Educate yourself about your community. What you don't know is to corruption's advantage.

Many Americans can name 10 Washington DC politicians but can't name 10 local politicians. This is a backward way of running our Republic. For it is not some citizen's job from the next county or next state to know who are your local politicians. It's you and your neighbors right to know.

Below we've made a basic list to fill in for your files.

While filling in this list you should be asking some interesting questions.

Was the person born in the region?

How long were they a resident before taking political office?

What collage did they attend?

These 3 questions go to whether or not the elected person was installed into the post or truly elected by the people. Anyone that lived near you for a short time before gaining political office is suspect. Even more so if they were in politics before arriving there.

Write down what people were in charge for the past 2 elections counting the votes. And who will be in charge for the next election.

\_\_\_\_\_  
 \_\_\_\_\_  
 \_\_\_\_\_

Over all facts matter greatly and paint their own picture. Write a biography on all elected & appointed officials, Businesses & property owned, first ran for office, time in office, etc.

Example;

Mayor : Robert J. Jones, Elected 2009, Democrat, Married, wife Francine I. Smith Jones,  
 2 Children under age 18. Mrs. Jones owns local flower shop, Buds Flower Emporium, 87  
 Elm Street, same city as Mr. Jones is Mayor. Home; 55 Trees St. 54110 Mayor Jones

owns local shipping business ; Jones Freight, LLC, 500 High St., Next Town, AR, 54700  
Mayor Jones relations ; Kelly H. Jones school Principal – Our Town High School,  
Democrat, See Bio... Brother- Gram Jones, lives in Kentucky, no bio we can find other  
than he is a Republican. Other property; 4 rental homes in town. Addresses are, 1 2 3 4

Major complaints about this mayor are; Make list...

Some bios will be longer and some very short. If you recall "Know everything?"

Even this simple batch of information collects a huge amount of data. But also tells a huge story. So let's break it down. In this example. When this comes in HQ, we see first that no bio on the brother or any on the wife's family. So ,HQ will contact the Kentucky team and see what can be found on him. Major reason the Mayor owns a shipping company. Shipping to where? Kentucky? That the Sister runs the local High School is also interesting. So, HQ will look into special favors that might be benefiting both.

That both Mr. & Mrs. own businesses & rental property is cause to look for conflict of interest. And finally the major complaints. If you have been attending regular town meetings this should be easy to write out. However, if you have not then you will have to track down someone(s)who has interviewed them for what they know. Also dive into news archives going back to before he was elected.

It is not uncommon for local radio or TV personalities to push the deception of being local residence while actually living out of state. So more investigation of who controls the media narrative is important. By now you should be aware of the MK Ultra programming by the CIA. Which is an effort to make every American believe the same thing at the same time. Often not the truth.

Local Media Market. State \_\_\_\_\_ City/ Town

Normally we would recommend enlisting friends to help with the list. And we greatly encourage you to do this. The more people that understand their local community the better. But requests for assistance can be met with willful ignorant resistance. So there is another way by using Artificial Intelligence.

These AI Chat Bots of different makers can retrieve, sort by political party, and add histories to local people. Helping paint the picture of facts. When asked the right questions. In the past we have use these bots to save many hours gaining information from internet & public records. They as not just for entertainment.

The main thing to keep in mind when using this method of research, is using an AI bot that works with the way you think. In the progressive order in which you want the information. There are many to pick from. As the Commander of The S2 Project I prefer AI's that can fetch information like a dog fetching a stick. Big branches of general information of a town or city or county government 1<sup>st</sup>. Then smaller sticks to define the information. After knowing who the players are it's 'follow the money' questions. I find Gab AI basic AI personality a good choice for this. But I use others. Each one like anything take a little practice.

Another tip;

Do not insert bias into your questions and be aware about getting bias answers. You're Detective Joe Friday looking for the facts. And that is what you want in return. If you get bias answers or the AI starts asking the questions other than: "Was This Helpful", move on to another AI.

You will also want to interrogate the AI your using to know what the capabilities are. Asking what it can do and what it cannot do.

As to the willful ignorant resistance you may encounter form friends. Sharing the information you do obtain can help overcome this. Sometimes people need to be shown what is possible.

Overall, sharing the information is the goal here.

For more information here is some contact information. Listen Toll free to our recorded message 877-783-7778.

Leaving you're own message at the end is totally optional but we would like to get your opinion on it. Commander's Email; [S2HQ@protonmail.com](mailto:S2HQ@protonmail.com) – Commander on Twitter/X; @The\_S2\_Project.
